

Skills

- 6 years of manufacturing and assembly experience, including:
 - Composites
 - Machining
 - Automated Bonding w. Cobots
 - 3D Printing
 - Injection Molding w. Robots
 - Manual assembly and bonding
- Experience with Engineering Analysis:
 - Statistics: Process Control, Multivariable Regression
 - Finite Element Analysis (FEA)
 - Elementary Control Systems Design
 - Optimization
 - Design of Experiments
 - Vibrations Analysis
- Experience manufacturing in a regulated environment:
 - ANSI9100
 - ANSI/RIA 15.06
 - Boeing Specifications
 - ISO9000
 - ISO/TS 15066
- Experience with MATLAB, R, and Python programming.
- Proficient in designing, assembling, and debugging tools and fixtures.
- Proficient with CAD software – CATIA V5, SOLIDWORKS, AutoDesk Inventor.
- Leadership experience demonstrated through volunteer work.

Work Experience

Manufacturing Engineer

Jan 2017 – Present

Tool Gauge (TG) | Tacoma, WA

- Established a reputation for high quality work delivered ahead of schedule.
- Ensured manufacturing compliance to Boeing specifications, AS9100 requirements, and OSHA robotic safety requirements (ANSI/RIA 15.06).
- Utilized 3D (FDM) printers to produce on-demand fixtures, test processes, and reduce the cost of existing fixtures by over 50%.
- Designed cobotic cell supporting six part configurations saving an estimated \$200,000 per year, featured on the [Universal Robots website](#).
- Developed software tool for tracking changes in customer purchase requests, saving hours of work every month for project managers and executives.
- Led sprue picker (robotics) implementation of TG's next generation presses.
- Designed quick change system for sprue picker end of arm tools.
- Programmed complicated picking operations for tools with intricate cavities

Associate Civil Engineer

Jun 2016 – Aug 2016

City of Seattle | Seattle, WA

- Facilitated project coordination and inter-department communication.
- Drove the development of new procedures detecting conflicting projects in critical locations.
- Managed and assisted communications between public and private industry stakeholders throughout the City of Seattle

Teaching Assistant: Computer Assisted Machining and Computer Assisted Design

Apr 2015 – Jun 2016

Western Washington University | Bellingham, WA

- Walked students through problem solving methods when programming in G-Code, using CAD (CATIA V5), and CAM (CATIA V5 and Vericut)
- Demonstrated troubleshooting abilities when evaluating and correcting G-Code and CAD models submitted by students

Student Tutor: Physics, Chemistry, Math, and Statistics

Sept 2013 – June 2016

Western Washington University | Bellingham, WA

- Educated students in technical subjects, primarily through problem solving, intensive tutoring was possible when time allowed.
- Collaborated with both supervising instructors and a team of my peers.

Volunteer Experience

Chair, Society of Manufacturing Engineers

Seattle Chapter 39, Jan 2021 – Present

- Coordinated and directed monthly chapter meetings.
- Managed chapter recovery during the Covid-19 pandemic.
- Networked with local industry partners and organizations to arrange tours, contacts, and speaking events.
- Supervised outreach events to student and national chapters.
- Led chapter executive infrastructure improvements.

Chair-Elect, Society of Manufacturing Engineers

Seattle Chapter 39, Oct 2019 – Jan 2021

President, Society of Manufacturing Engineers: WWU Chapter

Jun 2015 – Jun 2016

- Organized community events, groups for multiple competition entries, inter-club co-operation.
- Facilitated the development of 3D printing maker space for university engineering department.

Education

Saint Martin's University (SMU), GPA 4.0

Grad: 5.2022, *Anticipated*

Lacey, WA

M.S. Mechanical Engineering

Thesis: *Characterizing the Hayward-Robles Phenomena Using a Haptic Microactuator*

- Electromechanical Machines
- Control Systems Design
- Optimization with MATLAB
- Vibrations
- Photovoltaics
- Finite Element Analysis (FEA)
- Robotics

Western Washington University (WWU) GPA 3.25

Grad: 6.2016

Bellingham, WA

B.S. Manufacturing Engineering, ABET Accredited

Mathematics Minor

- Advanced CAD
- Advanced CAM
- Automation and Control
- Composites Design and Manufacturing
- Design for Manufacturing
- Design of Tooling
- Industrial Robotics
- Plastics Design and Manufacturing
- Statistics with Calculus
